

Zyxel WAX620D-6E-EU0101F wireless access point 4800 Mbit/s White Power over Ethernet (PoE)

Model: WAX620D-6E-EU0101F

Manufacturer: ZYXEL

EAN: 4718937625529

Product Code: 611812

R12,504

Delivering up to 5.4Gbps WiFi speed, the Zyxel WAX620D-6E is fully equipped with the next-gen WiFi 6E technology for ultra-fast speeds and low-latency connections.

The BandFlex radio design allows the AP to support either 5GHz or 6GHz band by configuration, making it the most budget-friendly choice to fit into your existing 5GHz coverage, as well as futureproofing the use of 6Ghz.

With only 6E-compatible client devices operating on the new band, the 6GHz presents the best solution to alleviate congestion in the existing bands. To fully maximize the performance, Zyxel 6E Boost with the 4x4 streams in 6GHz effectively helps extend its range and ensure the highest performance is delivered to every connecting users and devices.

Designed with the innovative 'Dual-optimized' antenna, the WAX620D-6E adapts to both wall- and ceiling-mount installations. Users can switch between the two optimized antenna modes easily to fit either situation to boost WiFi performance.

The NebulaFlex Pro technology offers the flexible management for users to freely switch between the Nebula cloud-managed mode, WLAN controller, and device's local web interface based on their needs. The Nebula's mobile App is also available when using the cloud-managed mode.

WiFi 6E – the Fastest Speed EVER

The WAX620D-6E includes all the benefits of WiFi 6 capabilities and brings them into the brand-new, interference-free 6GHz that more than doubles the WiFi capacity to deliver ultra-fast WiFi 6E speeds, and low-latency connections.

The most budget-friendly choice with BandFlex radio

The BandFlex radio design allows the AP to support either 5GHz or 6GHz band by configuration, making it the most budget-friendly choice to fit into your existing 5GHz coverage, as well as futureproofing the use of 6GHz.

Zyxel 6E Boost

The high-gain 4x4 streams in 6GHz design helps increase the maximum gains in transmit beamforming and receive MIMO to extend range and maximize the performance of the new band.

Say goodbye to WiFi congestion

The new 6GHz band is the best solution to alleviate congestion in the existing bands. Zyxel 6E Boost with high-gain 4 streams in 6GHz to effectively help extend range and ensure maximum performance for SB/SMB networks.

Optimized performance for wall or ceiling mounting

Designed with the innovative 'Dual-optimized' antenna, the WAX620D-6E adapts to both wall- and ceiling-mount installations. Users can switch between the two optimized antenna modes easily to fit either situation to boost WiFi performance.

Manage It Your Way!

The WAX620D-6E with NebulaFlex Pro offers the flexible manageability for you to freely choose between the device's local web management, WLAN controller, or onboarding to our super easy
