From airplane noise to people’s voices, our WH-1000XM5 wireless headphones with multiple microphone noise cancelling keep out more high and mid frequency sounds than ever. And with Auto NC Optimizer, noise cancelling is automatically optimised based on your wearing conditions and environment.

See what a difference noise cancelling can make

Multi Noise Sensor technology

With four microphones on each earcup, this is our biggest ever step forward in noise cancelling. Ambient sound is captured even more accurately for a dramatic reduction in high frequency noise. Thanks to Auto NC Optimizer, noise cancelling performance is always and automatically optimised based on wearing conditions and external environmental factors such as atmospheric pressure.

Incomparable noise cancelling

Specially developed by Sony, the Integrated Processor V1 unlocks the full potential of our HD Noise Cancelling Processor QN1. This unique combination of technology controls eight microphones to deliver unprecedented noise cancelling quality.

Specially designed 30mm driver unit

The specially designed 30mm driver unit featuring a soft edge enhances noise cancelling helping you enjoy your music precisely without ambient noise. The carbon fiber composite material realizes light weight and high rigidity dome and improves sound clarity, especially in high frequency ranges.

Superlative sound, engineered to perfection

The specially designed 30mm driver unit with light and rigid dome using carbon fiber composite material improves high frequency sensitivity for more natural sound quality. Sony unique technologies include a premium lead-free solder containing gold for excellent conductivity, Fine Sound Resistor for even power distribution, and optimised circuitry for an improved signal-to-noise ratio to ensure clear, consistent sound.

Enjoy High-Resolution Audio with and without wires

The WH-1000XM5 supports High-Resolution Audio and High-Resolution Audio Wireless, thanks to LDAC, our industry-adopted audio coding technology. LDAC transmits approximately three times more data1than conventional Bluetooth® audio for exceptional High-Resolution Audio quality.

Real-time restoration of all your compressed files

Using Edge-AI (Artificial Intelligence), DSEE Extreme™ upscales compressed digital music files in real time. Dynamically recognising instrumentation, musical genres and individual elements of each song, it restores high range sound lost in compression.

Advanced call quality

Our Precise Voice Pickup Technology uses four beamforming microphones and an AI-based noise reduction algorithm to isolate your voice precisely. A newly developed wind noise reduction structure minimises wind noise during calls. Wherever you are, you'll always hear and be heard clearly.

Multiple microphones, focused on your voice

Equipped with four beamforming microphones, these headphones are calibrated to only pick up your voice. An improved signal-to-noise ratio enables them to catch every single word, even when there's a lot of noise around.

Ultra clear, noise-free calls

With Precise Voice Pickup Technology and advanced audio signal processing, the person on the other end of the call will hear your voice clearly, even when you are in noisy situations. Our noise reduction algorithm was developed with AI machine learning using more than 500 million voice samples to suppress ambient noise and extract your voice clearly in a wide range of environments.

All day comfort with a noiseless design

These lightweight headphones are beautifully finished in newly developed “Soft fit leather”. This material fits snugly around the head with less pressure on the ears while keeping out external sounds. Our noiseless design with stepless slider, seamless swivel and hanger makes WH-1000XM5 a pleasure to wear.

Your New Colour, Smoky Pink

A soft and sophisticated pink with an elegant and muted tone that blends with your personality. The powdery matte texture and nuanced colour with a slight pinkish tint add moderately brilliance while blending with your skin tone and fashion.

Effortless operation

Our smart features make it easier than ever to access and enjoy your entertainment throughout the day. For example, you can play music and control the volume without opening your phone by simply pressing a button on your headphones. It also detects when you speak and can temporarily stop the music. Operating these headphones is effortless and they will fit seamlessly into your life.

Adaptive Sound Control automatically adjusts to whatever you do

Adaptive Sound Control is a smart function that senses where you are and what you’re doing, then adjusts ambient sound settings for the ideal listening experience. When activated, it learns your behaviour and recognises locations that you frequently visit, such as your workplace or a favourite café, and tailors sound to suit the situation.

For everyday convenience, just Speak-to-Chat

As soon as you start a conversation, Speak-to-Chat automatically stops your music and lets in ambient sound – handy if you want to keep your headphones on or talk hands-free. This smart feature uses microphones built into your headphones and advanced audio signal processing to recognise and react to your voice. Once your chat is over, your music starts playing again automatically.

Quick access to your favourite music and soundscapes

A shortcut to your music with simple taps – with no need to touch your smartphone.678 You can enjoy your music in an effortless way.

Scene-based listening

Provides a sound experience just tailored to you by sensing the current situation and scene such as walking, running and gym.

Plays music automatically.
You can enjoy music exactly when you need them by turning on Wear to Play and each scene. Playback starts automatically when you put your headphones in – no need to touch your smartphone – and plays the right music for the moment, based on your daily routines or sensing activities like a daily walk, gym workout, or commute. And, with Voice Cue you'll still be notified of important information like appointments and reminders, so you can always stay connected to both life and entertainment wherever you go.

Instant pause. Instant play.
Just take the headphones off and the music stops – a capacitive sensor knows when you are wearing them. It also helps improve detection accuracy and design. Put the headphones back on and the music starts again.

Control with your voice

Get hands-free help – Just say “Hey Google” or “Alexa” to activate your preferred voice assistant.10Listen to music, connect with friends, get notifications, set reminders, and more. You can even control your headphones features like noise cancellation with your voice11, listen to and interact with emails in Microsoft Outlook, and join Microsoft Teams meetings using Google Assistant or Siri.

Total convenience, total customization

WH-1000XM5 is even better with the Sound Connect app. The simple, intuitive interface lets you dial in your ideal sound and shortcut settings, and can keep track of your recent listening history. Safe Listening even lets you check you're in line with WHO healthy listening habits.

Multipoint connection

For total convenience, these Bluetooth® headphones can be paired with two Bluetooth devices at the same time. So when a call comes in, your headphones know which device is ringing and connects to the right one automatically. You'll also be able to quickly switch your headphones to either of the two devices at the touch of a button.

Find your headphones with Fast Pair

The WH-1000XM5 supports Google's helpful new Fast Pair feature. It lets you easily locate where you left your headphones by tone sound, or checking their last known location in Google's Find My Device app on your smartphone.

Easy pairing with your computer

Swift Pair makes it quick and easy to pair your headphones with your Windows 11 or Windows 10 laptop, desktop PC or tablet. Pop-up pairing guidance appears on nearby Windows 11 or Windows 10 devices when pairing mode is selected.

All day power and quick charging

With a huge 30 hours of battery life you'll have enough power even for long trips. If you need to top up in a hurry, you can get 3 hours' worth of charge after just 3 minutes with an optional USB-PD compatible AC adapter.

Everything's at your fingertips

The WH-1000XM5 headphones feature intuitive touch control settings – for example, push the button on the left side to switch from Noise Cancelling to Ambient Sound or use the touch panel on the right side to play or pause music, skip tracks, change volume and much more.

Collapsible case, saves space

Carry your headphones effortlessly in the soft matching case. Take them out and collapse the case for easy storage in a bag.

Better for the environment

There’s no plastic in the WH-1000XM5 packaging14, which is designed based on low toxicity design principles and a ‘Made to be Remade’ philosophy that’s more socially responsible. The product box is produced using recycled and sustainable materials developed specially for Sony. WH-1000XM5 also uses recycled plastic materials from automobile parts.

Certified headphones for a personalised experience

With 360 Reality Audio certified headphones and the Sony | Sound Connect app, optimise your experience by analysing your individual ear shape, and enjoy the ultimate immersive music experience.

A personal cinematic experience
With BRAVIA™
Enjoy a thrilling Dolby Atmos® experience and 360 Spatial Sound that adapts to your ears with BRAVIA and these headphones.

360 Spatial Sound Personalizer

With the Sony | 360 Spatial Sound Personalizer app19, you’ll enjoy a sound experience that’s optimised for you. The app captures and analyses your ear shape, allowing these headphones to create your own personal spatial sound field when paired with BRAVIA TVs.

Accessibility

We believe technology should make the world more interactive, more creative, more entertaining, and more inclusive. By incorporating human-centric, inclusive design into our audio products, we deliver our Kando experience to all our users, regardless of age, ability or environment.
