Zyxel XS1930-12HP-ZZ0101F network switch Managed L3 10G Ethernet (100/1000/10000) Power over Ethernet (PoE) Black

Model: XS1930-12HP-ZZ0101F

Manufacturer: ZYXEL

EAN: 4718937605262

Product Code: 612297

R16,583

Light Up the Speed

Zyxel’s XS1930 Series Multi-Gigabit Smart Managed Switch

Breakthrough 1 Gbps

The new XS1930 Series switch supports IEEE 802.3bz standard for delivering Multi-Gigabit technology on existing wiring infrastructure which offering up to 10 times more bandwidth capacity without expensive and disruptive cable upgrades. In addition, it is designed with industry-first 5-color LED to instantly display the operating port speed.

New era of connectivity

Each of the Multi-Gigabit ports on XS1930 Series Switch support speed 100M/1G/2.5G/5G/10G that are suitable for every network device. For 2.5G/5G capable devices such as WiFi 6 (11ax) AP, servers and workstations now are able to operate at the maximum speed without forcing the connection downgrades to 1G.

True backbone of WiFi 6

WiFi 6 needs higher speed LAN (>1Gbps) and power (PoE++). The PoE model XS1930-12HP supports the latest PoE standard IEEE 802.3bt (PoE++) providing port power up to 60W for WiFi6 AP, as well as backwarding compatibility with existing PoE/PoE+ devices. With a large power budget of up to 375W, XS1930-12HP gives enough headroom for connections up to 8 WiFi 6 (11ax) APs.

Experience The Near Silent Operation

The built-in smart fan is designed to automatically adjust speed based on device temperature. You can barely hear the sound while the XS1930 series is operating. It is ideal for your office environment.

Manage it your way!

The XS1930 Series introduces Zyxel NebulaFlex, which allows you to easily switch between standalone mode and our license-free Nebula cloud management platform anytime with just a few simple clicks.

Smart managed switch inside and out

The XS1930 Series aims to widen user experience with its unique One-touch ‘Restore’ button as well as fully-loaded SMB features such as VLAN, enhanced QoS, and LAG along with IPv4/IPv6 Layer 3 static route, can all be configured via its local user-friendly web interface efficiently.
