Conduction that is also Hi-Res Audio Wireless certified. The unique adjustable split ear hook features a soft and ergonomic design, enriched by metallic accents, that ensures a secure fit, personalized for your ears for all-day comfort. Four voice mics, our proprietary AI-trained algorithm for noise reduction and the Voice Pickup Sensor for voice clarity make sure your calls come through loud and clear even on a breezy day. And if a little drop comes along, JBL Sense Pro boasts an IP54 rating. With a battery that lasts up to 38 hours wirelessly rechargeable, the JBL Sense Pro got your back throughout the longest days. Use the JBL Headphones app to fine-tune a personalized listening profile and customize the intuitive touch controls so you can control your music and calls your way.

JBL OpenSound Technology & Spatial Sound

JBL Sense Pro headphones rest comfortably on the curve of your ear, not in your ear canal, so you'll always hear the world around you. At the same time, the sound is directed straight into your ears, so no one can hear your music or calls, even if they're standing right beside you on the subway. Meanwhile, JBL Spatial Sound makes the audio feel like it's enveloping you with stereo content from any device.

Hi-Res Audio Wireless with adaptive bass boost

Enjoy studio-quality Hi-Res Audio Wireless sound. LDAC transmits three times more data than Bluetooth audio, delivering high-performance 24-bit sound. And the adaptive bass boost algorithm adjusts the bass depending on how loud you're listening, so you'll always have precise, deep, rich, dynamic sound without distortion.

4-mic crisp, clear calls 2.0 with AI-trained Algorithm

With your JBL Sense Pro headphones, you can take calls anywhere. Featuring two beamforming mics per ear to accurately capture voice, the JBL Sense Pro also boast an AI-trained algorithm that reduces environmental noise. Plus, the Voice Pickup Sensor captures the bone vibration and works with the dual mics system to dramatically enhance voice clarity. The wind-resistant design of the JBL Sense Pro reduces air flow disturbance around the microphone pickup area to make your calls crystal clear even in the noisiest spaces.
