R2,359

Great sound, multitasking smart case

You'll flow through your day with these great-sounding true wireless earbuds and their smart charging case. Noise cancelling lets you listen free from distractions, while the case lets you take control without reaching for your phone.

The product information provided is for reference purposes only. Technical specifications, photos, descriptions and prices may change without prior notice. The manufacturer and seller are not responsible for possible data discrepancies or typographical errors. We recommend checking the current information before purchasing.

Smart charging case. Touch controls for music and more

You can use this case to take calls, control playback and noise cancelling, tweak bass and treble, or find a missing earbud. The 1.47" touchscreen also features a clock and a timer, plus a torch function that emits bright white light. A true multitasker, the case can even take photos by remotely triggering the camera on your connected device.

Noise cancelling for your sounds, your focus, your world

Music, calls, podcasts, movies. When you want to focus, you can activate and control noise cancelling via the earbud's touch controls, the smart case or our companion app. Handy features include Awareness Mode to let outside sounds back in. Quick Awareness enhances voices so you can have a conversation without removing an earbud.

4 mic technology. Clearer calls, even in crowded places

If you're on a call, our four-mic setup and a noise-reduction algorithm will combine to pick up the sound of your voice and quieten background noise. Even if you're in a busy cafe, your voice will come through clearly and the person you're speaking to won't need to listen to all the other conversations going on around you as well!

Great sound even at low volume with Dynamic Bass

You won't need to turn up the volume to get the best sound out of the 10 mm drivers in these true wireless earbuds. Activate Dynamic Bass via the customisable earbud controls or the Philips Headphones app and you can enjoy the full power of your favourite basslines even if listening quietly.

Up to 28 hours of play time

With noise cancelling off, you get 7 hours play time from a full charge and an extra 21 hours from the smart charging case (with noise cancelling on, you get 5 hours and an extra 16 from the case). For a quick boost, 15 minutes gives you an extra 3 hours. The case can be charged via USB-C.

Stable Bluetooth® connection and multipoint connectivity

Bluetooth® 5.4 brings you a steadier connection for seamless streaming without annoying dips in the sound, even in built-up areas. Multipoint connectivity lets you connect to two Bluetooth® devices at the same time and you can easily manage connected devices via the Philips Headphones app.

Comfy, water-resistant, customisable

An IPX5 rating means these buds can handle the moisture if you sweat and a little light rain won't bother them either. You get three sizes of silicone ear tips for the perfect fit and you can customise how the earbud touch controls are set up via the Philips Headphones companion app.

Philips Headphones app. Custom control

Our handy companion app makes it easy to adjust settings for the smart charging case, including how long the screen stays on and whether it displays a 12- or 24-hour clock. You can also use the app to personalise noise cancelling, activate a low-lag setting for gaming, get the latest firmware and more.

Warm, detailed, natural. Philips sound signature

The custom drivers in these headphones are tuned to Philips sound signature, which brings you warm, detailed sound with rich bass. Whatever you're listening to, you'll love what you hear.

Responsible design and packaging

We're continually working to make our supply chain more sustainable and transparent. These earbuds are made with RCS-certified, post-consumer recycled plastics and our plastic-free packaging uses FSC-certified recycled cardboard and soy-based ink.
