for precise tracking, and tri-mode USB, 2.4 GHz RF, and Bluetooth® connectivity to support up to five devices.

DESIGN

Ergonomic and elegant silhouette

With its elegant ergonomic profile, ProArt Mouse MD301 provides a natural and comfortable grip that enhances every movement. Its smooth curves and side wave-textured design offer stable hand support, allowing you to work and create in comfort.

DESIGN

Swappable switches

You can easily swap out and replace worn left and right button switches to extend the lifespan of ProArt Mouse MD301, instead of replacing with another mouse. Support for both micro and optical switches ensure a personalized click feel, as well as long-term consistency and precision.

DESIGN

SmartShift Wheel

Seamless switching between precise line-by-line control and high-speed free-spin scrolling for enhanced accuracy and efficiency.

SCENARIO

Empowering imagination

ProArt Mouse MD301 is designed to empower creators to bring their ideas to life.

CHARGING1

Power up with a 60-second boost

ProArt Mouse MD301 stays powered for up to 180 days on a full charge — and provides up to 3 hours heavy use or up to 8 hours of light use from a quick one-minute charge via USB-C®.

HIGH-PRECISION SENSOR2

Fast and accurate tracking on almost any surface

A high-end sensor tracks at up to 8000 dpi and works on a wide range of surfaces — including glass — for unmatched accuracy and precision. ProArt Mouse MD301 also boasts a 1000 Hz polling rate in both wired USB and RF 2.4 GHz modes to keep lag down for fluid cursor movement. In addition, low-friction PTFE mouse feet ensure a smooth glide.

CUSTOMIZATION

Shape workflows with ease

Six programmable buttons allow for extensive personalization to suit custom workflows, while two scroll wheels enable effortless viewing on long pages or documents.

SOFTWARE

Perfect for creative apps

An intuitive UI lets you tune ProArt Mouse MD301 to suit varying creative needs. Adjust performance settings and customize commands, six programmable buttons and two scrolls.

CONNECTIVITY

Connect wirelessly to multiple devices

The RF 2.4 GHz wireless connection provides high data throughput to ensure accurate, lag-free input for a seamless creative workflow. You can also connect to three devices via Bluetooth fast-pairing technology and switch between them by pressing the Pair button.
