LG CreateBoard boasts a multi-touch functionality that can concurrently detect up to 40 touch points. This feature facilitates simultaneous touch and gesture inputs from multiple users, fostering easy collaboration and idea sharing among team members. This enables efficient interaction in group activities or meetings.

Connect Your Own Device for OS Flexibility

LG CreateBoard integrates smoothly with devices across various operating systems, including Windows, Android, and ChromeOS, allowing users to work within their preferred environments. This creates a flexible and highly adaptable workspace tailored to individual needs.

C-Type Connection

USB-C connectivity simplifies connections which enables charging and sending data simultaneously over just one single cable.

OTA (Over-The-Air) Functionality

OTA (Over-The-Air) functionality built into the LG CreateBoard enables software updates to be performed wirelessly and automatically, allowing users to maintain the latest features and security patches.

Front Connectivity Design

LG CreateBoard is designed with front display ports, making it easy for users to connect or disconnect cables.

Built-In OPS Slot

LG CreateBoard supports OPS slots, allowing users to conveniently mount OPS Module at the back of the screen without the hassle of connecting to an external desktop. This enables various PC functions and Windows software.
