a high-performance gaming mouse that is lighter than the egg in your hand.

THE MOST EFFICIENT AND POWERFUL SENSOR

Introducing the X2, featuring the latest flagship PixArt's PAW3395 sensor. With its impressive capabilities, including high performance at 26000 dpi, 650 IPS, and 50G acceleration, it is optimized to deliver a top-notch competitive gaming experience. The main chip processor has been upgraded to the industry's leading Nordic MCU, providing exceptional power efficiency and precise, fast processing.

PixArt Motion Sync Technology

This latest flagship sensor from Pixart has the highest specs in the market with extreme precision of 99.6% resolution accuracy. However, this does not mean the sensor is more accurate tracking. To make your sensor more accurate tracking, the Motion-Sync Technology is built into the sensor. Your PC extracts information from another sensor at a rate that does not perfectly match the signal the mouse sends out when it extracts information from another sensor. The Motion-Sync Technology synchronize its signals intelligently at the exact intervals your pc extracts information. This allows the tracking to be very accurate. However, this may cause some motion-delay (less than 1ms) that is not noticeable during in-game play. You can choose to turn on and off this Technology by Pulsar Fusion Software.

FULLY CUSTOMIZE IT YOUR WAY

Precisely adjust everything with our Software. Re-assign keys, make macros, adjust debounce time as low as 2ms and more.

Summary: PULSAR X2. Form factor: Ambidextrous. Movement detection technology: Mechanical, Device interface: USB Type-A, Movement resolution: 26000 DPI, Response time: 1 ms, Buttons type: Pressed buttons, Scroll type: Wheel, Acceleration (max): 50 G. Power source: Cable. Product colour: White | Vendor Homepage: https://www.pulsar.gg/products/x2v2-wired-gaming-mouse?_pos=1&_sid=e39478967&_ss=r&variant=45347305259262 | Acceleration (max): 50 | Buttons type: Pressed buttons | Connectivity technology: Wired | Device interface: USB Type-A | Mouse tracking speed: 650 | Movement detection technology: Mechanical | Movement resolution: 26000 | Number of scroll wheels: 1 | Polling rate: 1000 | Purpose: Gaming | Response time: 1 | Scroll type: Wheel | Form factor: Ambidextrous | Product colour: White | Power source: Cable | Linux operating systems supported: Yes | Mac operating systems supported: Yes | Windows operating
