Product Code: 772373

R1,733

TAC75 HE Magnetic Keyboard- Black & White

TAC75 HE Magnetic Keyboard- Black & White features translucent legends and side-transmit lighting that lets illumination shine through every key.

With magnetic switches, users can easily customize the actuation distance, which is especially useful for gamers seeking rapid actions at their fingertips, particularly in FPS games, as demonstrated by the following functions: Snap Key, Rapid Trigger, Dynamic Keystrokes, Mod-Tap, Toggle Key and Deadzone Setting.

Cross-Compatible with Mainstream Magnetic Switches

TAC75 HE Magnetic Keyboard- Black & White provides compatibility with 5 third-party magnetic switches. Users can choose the appropriate switch from the Akko Driver list and calibrate the keyboard easily after replacement. Mixing and matching them in different keys is also possible.

Disclaimer: High-precision switches require tuning and experimenting with the keyboard. The switches listed are guaranteed to perform at 0.01mm precision. Other switches may work but are unable to reach the claimed accuracy. And mechanical switches are not supported.

RT 0.005mm

Achieve ultra-accurate 0.005mm Rapid Trigger and adjustable actuation distance in 0.005mm step. This allows users to fine-tune their typing or gaming experience, ensuring optimal actuation for faster response times with enhanced precision, ideal for competitive gaming.

RT Stabilizer

This “RT Stabilizer” mode is especially useful when set to a Rapid Trigger precision of 0.005mm, as magnetic switch keyboards may experience unintended inputs or disconnection from slight hand tremors, which can disrupt the overall gaming experience.

8K Polling Rate & 16K Universal Scan Rate

TAC75 features a stable 16K universal scan rate, a major leap from previous versions that truly unlocks the potential of 8K polling rate performance.

ARGB Backlit

TAC75 HE Magnetic Keyboard- Black & White can help you type in the dark with decent backlit. It has over 20 preset backlighting modes.

You can easily create and tailor your own lighting effects with the Akko Driver, which offers over 16 million unique colors per key, as well as adjustable brightness and animation speed level.

Snap Key

Snap Key is Akko’s implementation of SOCD, which prioritizes the most recent keypress for swift directional changes without releasing previous inputs. This ensures fluid and responsive control, especially in FPS games, where quick reactions and precise movements are crucial.

Rapid Trigger (RT)

Rapid Trigger dynamically changes the keys’ actuation and deactivation points. Through the Akko Driver, users can choose “All Buttons” or “Per Button” customization modes, as well as activate

“Non-stop Rapid Trigger” for near-instant key response. This gives FPS gamers a competitive edge in fast-paced gameplay.

For example, when gamers enable RT, they can achieve “Counter-Strafe” in VALORANT games.

Dynamic Keystrokes (DKS)

Pressing a key can trigger four different key operations.

Depending on your keypress force: a light press triggers action 1, a deeper press activates action 2, and releasing the key also supports a two-stage key setting.

Mod-Tap

Mod Tap is a design that provides convenience for gaming. It enables the creation of dedicated or dual-functional keys based on key press behavior.

A single keypress can achieve two functions: holding down the key for one function, and press the key for another.

Toggle Key (TGL)

Tap the key to continuously trigger the key or turn this mode off. Press and hold the key for a regular key press. Click to set the key you want to use as a toggle key.

Tapping the key can trigger it in two ways:

- Press and hold to automatically trigger the key
- Press and hold to trigger in a predetermined rounds

Adjustable Actuation Distance

These magnetic switches allow users to adjust every key’s actuation point from 0.1mm to 3.4mm, which offers different kinds of pressing for gaming or typing.

PBT Side-Printed Keycaps

PBT side-printed keycaps provide durability while maintaining a sleek, minimalist appearance.

Effective Cable Routing

Comes with a Type-C interface to fit the overall theme of the keyboard with 3-directional routing for better cable management.

Two Adjustable Feet

The wired magnetic keyboard comes with a tilted stand with 3 levels of adjustable heights of around 5° and 7.5° and 11° respectively to personalize your typing experiences.

Plate-mounted Stabilizers

TAC75 HE Magnetic Keyboard- Black & White utilizes plate-mounted stabilizers, which effectively minimizes keycap wobbling.

Summary: Akko TAC75 HE. Keyboard form factor: 75%. Keyboard style: Straight. Connectivity technology: Wired, Device interface: USB, Keyboard key switch: Magnetic key switch, Keyboard layout: QWERTY.
