mAP lite

The mAP lite is our smallest wireless access point. It is barely larger than a matchbox, we even had to use a special Ethernet port to match it’s slim profile.

You can carry it anywhere: use as a travel router to extend that hotel internet to all your devices, or as a client device to improve your laptop signal range, the tiny mAP lite will be always with you.

It can also serve as a simple configuration tool for your servers, if there is no ethernet on your mobile device.

The mAP lite is a dual chain 802.11 b/g/n device and operates in 2GHz.
