

Fujitsu MHY2120BH internal hard drive 120 GB 5400 RPM 8 MB 2.5" Serial ATA

Model: MHY2120BH

Manufacturer: FUJITSU

Product Code: 7924

R602 ~~R707~~

Fujitsu raises the bar with the introduction of its next generation 2.5-inch SATA hard disk drives with up to 125GB per platter using PMR technology. Since notebook and consumer electronics manufacturers are requiring increasingly higher capacity SATA hard disk drives in a slim package for their products, the new Fujitsu PMR models are entering the market at an optimal time to take advantage of this demand.

Engineered to deliver high capacity in a small form factor, the mobile series retains the outstanding level of quality and reliability for which Fujitsu is renowned. The 5,400 RPM mobile HDDs achieve up to 250GB(1) capacity, among the highest in the industry with this spindle speed. Featuring up to 250GB of storage space in a 9.5mm package, low power consumption and low acoustic noise, these 2.5-inch SATA hard disk drives are an excellent choice for today’s ultra-fast, high-capacity notebook computers and consumer electronics applications.

With the delivery of its next generation, perpendicular recording SATA hard disk drives, Fujitsu continues to demonstrate its strong commitment to technology leadership.

Fujitsu introduces its next generation Serial ATA hard disk drives developed using perpendicular recording.

- Ultra-high capacity mobile hard disk drives (HDDs) feature perpendicular magnetic recording (PMR) technology.
- 2.5-inch Serial ATA (SATA) hard disk drives feature up to 250GB(1) of storage in a slim 9.5mm package.
- Industry leading power consumption.
- Exceptionally high quality, reliability and performance.
- Ideal for notebooks and consumer electronics applications requiring high speed and high capacity.
