THOR 100 RGB

Programmable mechanical keypad designed for gamers, despite its small size Thor 100 RGB contains many features. The keyboard is equipped with 39 keys and red mechanical switches delivering extremely fast response time of 8ms and high durability for heavy use. Genesis Thor 100 RGB contains gaming software which lets you record different macros and functions to any key. You can also select one of 10 backlight modes and adjust the backlight colour of each key from full RGB palette of 16 million colours. Ergonomic wrist support provides comfort for many hours of gameplay and thanks to the compact size of the keyboard you can take it with you to any LAN party or tournament.

HIGH-QUALITY MECHANICAL SWITCHES

Thor 100 RGB keyboard is equipped with high-quality OUTEMU RED mechanical switches with a lifetime up to 50 million clicks, characterized by their linear motion, extremely-fast response time, low actuation point of 2mm and silent operation. These switches require only 45 grams of actuation force to activate.

GAMING SOFTWARE

The keyboard includes advanced gaming software which allows to you assign any function or record macros to each key and launch a murder fire with a single push of a button. Additionally, the software allows you to program various multimedia features or shortcuts.

EFFECTIVE RGB BACKLIGHT

Every proper gaming keyboard must not only be effective, but also look good. Thor 100 RGB offers an impressive RGB backlight which is not just for looks, but also helps you find the right keys in low light conditions. You can select one of ten backlight modes, where some modes allow individual colour settings for each key from the RGB palette (16 million colours). Most modes offer the option to adjust the backlight brightness level or speed and direction of the effects. If necessary, the backlight can be simply switched off.

N-KEY ROLLOVER

The keyboard is equipped with the N-key Rollover, which allows you to press any number of keys at the same time without worrying that one of them will not be registered.

DURABILITY, COMFORT AND COMPACT SIZE

Body of the Thor 100 RGB is made of durable materials that ensure strength and longevity. Ergonomic wrist support provides comfortable use even for several hours of game play and thanks to the compact size of the keyboard you can go to any LAN party or tournament.
