

Seagate Nytro 3330 15 TB 2.5" SAS 3D eTLC

Model: XS15360SE70103

Manufacturer: SEAGATE

Product Code: 8119

R36,590 ~~R40,040~~

The Seagate® Nytro® 3000 SAS SSD family includes the next generation of high-capacity, high-performance SAS SSDs designed with multiple endurance offerings optimized for demanding enterprise applications and improved TCO.

Industry-Leading Performance up to 2100MB/s

The Nytro 3000 SSD family delivers ultra-fast, consistent and easily scalable performance that saturates dual 12Gb/s SAS bandwidth, providing an effective 24Gb/s wide-port interface along with legacy sign and dual-port dynamic configurations. By removing the storage bottleneck, it significantly improves overall system and application responsiveness and provides consistent low-latency data access, reliably accelerating enterprise and cloud storage systems.

High-Capacity Solution With Multiple Endurance Offerings

Enterprise applications have different storage workload requirements for performance, endurance and cost. The optimal storage solution for databases or virtualization with a typically mixed read/write workload, for example, requires the highest random read/write IOPS, ultra-low latency and high endurance. Content streaming applications with highly intensive read workloads, however, demand high sequential read throughput and high storage density at the lowest cost per gigabyte. The Nytro 3000 SSD family offers an industry-leading range of capacities up to 15TB in a 2.5-inch form factor, to increase enterprise storage density in data centers. It also enables lower TCO by offering four endurance categories to match cost and performance requirements of all enterprise workloads.

Enhanced Enterprise Reliability, Data Protection and Security

The Nytro 3000 SSD family leverages Seagate's decades of enterprise SAS expertise to deliver the highest levels of reliability, data integrity and data security for missioncritical enterprise applications. The Nytro 3000 SSD family helps deliver exceptional data protection and reliability by integrating full internal and external data path protection (T10 DIF), Seagate's advanced ECC algorithms, media lifecycle management, and other techniques for extending flash memory life. With advanced power-loss data protection, the Nytro 3000 SSD maintains high data integrity to help prevent loss of user data in the event of unexpected power interruptions. The Nytro 3000 SSD family implements security features to prevent unauthorized access to a drive and safeguards stored data with three levels of security, including Secure Downloads & Diagnostics, TCG-compliant Self-Encrypting Drive and FIPS drive.
