TP-Link Omada Gigabit VPN Router

Model: TL-ER7206

Manufacturer: TP-LINK

EAN: 1210002611220

Product Code: 838888

R3,862

A Professional, Secure, and Reliable Gateway with Centralized Management Capability

Omada Gigabit VPN Router

- Centralized Management
- Gigabit Ports
- Up to 5 WAN Ports
- Load Balance
- SSL/Wireguard/IPSec/OpenVPN
- Multi-Net DHCP
- Powerful Firewall
- Omada App

Omada SDN—The Smarter Cloud Solution for Business Networking

As the gateway that seamlessly integrates into the Omada Software Defined Networking (SDN) platform, ER7206 allows for remote and centralized management, anywhere, anytime. Standalone management via the Web UI or app is also available to maximize convenience.

Hassle-Free Centralized Cloud Management:
100% centralized cloud management of whole network from different sites—all controlled from a single interface anywhere, anytime.

Up to Five WAN Gigabit Ports to Optimize Bandwidth Usage

One gigabit SFP WAN/LAN port, one gigabit RJ45 WAN port, and four freely interchangeable WAN/LAN ports allow the router to support up to five WAN ports to satisfy various internet access requirements through one device. The multi-WAN Load Balancing function distributes data streams according to the bandwidth proportion of every WAN port to raise the utilization rate of multi-line broadband.

Highly Secure VPN

ER7206 supports multiple VPN protocols including SSL / Wireguard/ IPSec/ OpenVPN/ GRE VPN§/PPTP/ L2TP/ L2TP over IPSec, helping users to establish VPN connections more flexibly. One-click auto IPSec VPN* greatly simplifies VPN configuration and facilitates network management and deployment while also securing and encrypting private site-to-site data communications traveling over the internet.

Abundant Security Features

Powerful Firewall

Advanced firewall policies protect your network and data.

Convenient VLAN Support

Create virtual network segments for enhanced security and simplified network management.

DoS Defense

Automatically detects and blocks Denial of Service (DoS) attacks such as TCP/UDP/ICMP Flooding, Ping of Death, and other related threats.

IP/MAC/URL Filtering

Forcefully prevent viruses and attacks from intruders.

IP-MAC Binding

Reserves static IP assignment for clients to defend against ARP attacks and spoofing.

One-Click ALG Activation

One-Click ALG Activation for applications such as FTP, H323, SIP, IPsec and PPTP.

Internet Access Management Strategy

Standardize users’ online behavior and easily specify the internet access rights and strategies of employee via IP/MAC/URL Filtering and Access Control List (ACL). Captive Portal authentication facilitates network resource control by capturing, authenticating, and classifying user access. Appropriate network resources can also be allocated for particular users or guests.

Easy Management with the Omada App

Follow configuration instructions on the free Omada app to get set up in minutes. Omada lets you configure settings, monitor the network status and manage clients, all from the convenience of a smart phone or tablet.
