Maximums the flexibility for your network.
The XGS1010-12 features with 1G ports, 2.5G Multi-Gigabit ports, as well as 10G fiber ports. This port combination is capable of servicing a range of network devices such as gaming pc, NAS, workstation, or WiFi 6 AP.

Experience hyper-fast 2.5G networking!

Equipped with two 2.5G Multi-Gigabit ports, the switch gives your wired connection a boost, with speeds that are 2.5 times faster than standard Gigabit connections. It is the most ideal option to work with new motherboard for speedy file transfers, lag-free gaming, and high-res video streaming.

10G SFP+ Ultra Speed Uplink.
Provide two SFP+ ports compatible with 10GbE, which offers higher transmission speeds, instantly upgrade to a hybrid high-speed network environment at a cost-effective price.

QoS for Better Traffic Control.
The Zyxel XGS1010-12 comes with two high-priority and two medium p-priority ports, which provides enhanced download quality, all while giving you a better surfing, gaming, and streaming experience on other devices.

Easy to Use, No Setup Required.
Its easy plug-and-play design allows you to connect the XGS1010-12 to VoIP, media players, game consoles, set-top box, and any other web browsing devices to your home or studio network without any configuration.

Saving energy and space.
The fanless design ensures noiseless operation. Also, its built-in Energy Efficient Ethernet function automatically adjusts power consumption to dynamically reduce power usage during low link utilization. The wall-mount installation design provides more flexibility for wired home or office networks.
