AX1500 WiFi 6 Performance

Designed for today’s device-dense homes. Ideal for 4K streaming, VR gaming, video calling, and keeping all your smart home devices connected.

Powered by AI

AI-based capabilities empower your network to automatically optimise itself1. And create a safe online experience for your family with parental controls.

OFDMA

Small data packets destined for multiple devices are transmitted together and never have to queue up again. Perfect for bandwidth-hungry devices battling for bandwidth.

Easy Setup & Management

Easy to set up with a touch of a button through WPS or the EAGLE PRO AI app.

Expandable Coverage

D-Link Wi-Fi Mesh allows you to create a reliable mesh network with other D-Link Wi-Fi Mesh devices, enabling up to a total of 600 sqm coverage

Expanding your Wi-Fi network is easier than ever.
From single-storey flats to 4-storey houses with garden decks — simply add E15 Wi-Fi extenders to your existing network and enjoy an extended network that eliminates Wi-Fi dead zones in those hard-to-reach areas. You can also create a seamless mesh network by using the extender with D-Link’s EAGLE PRO AI and mesh products.

Enjoy AI convenience and a reliable mesh network.
When used together with the D-Link R15 router, you can enjoy AI features and seamless mesh that continuously connects you to the best Wi-Fi channel using its AI Wi-Fi Optimiser, as well as prioritises your most critical internet usage for optimal online stability via its AI Traffic Optimiser, ensuring the strongest signal and fastest speeds are always being automatically delivered to all corners of your

home.

Faster and more efficient than ever before.

Next-gen Wi-Fi 6 is perfect for smart homes where you need fast and reliable connectivity on multiple devices at the same time. Wi-Fi 6 provides a strong network that enables the whole family to stream, game or work, without having to worry about buffering, dropouts or interference.

Reliable and efficient connectivity.

The E15 features bi-directional MU-MIMO to handle more simultaneous users at faster data rates, and beamforming technology greatly extends Wi-Fi coverage area and boosts overall network efficiency.

Fast-track all your data and connect more devices.

Increase your network capacity by up to 4x by using Wi-Fi 6, which uses 8x8 uplink/downlink, OFDMA, and BSS Colouring to handle more devices on the network with incredible efficiency. Now you can add more devices to your smart home with a network you can rely on to handle all your devices and more.

Convenient wall-plug design.

The E15 is designed to be simple to install, intuitive to use and an inconspicuous addition to your household decor.

The space-saving wall plug design includes a WPS (Wi-Fi Protected Setup) button that enables rapid setup, and a visual Wi-Fi signal indicator that will help you find the optimal spot in your home. The E15 also comes with a handy Gigabit Ethernet port for when you need wired connectivity.

Stay protected from online threats.

Privacy has become more important than ever. WPA3 technology is the latest security standard and uses powerful 128-bit encryption to keep your connections safe and secure from unauthorised access, so you can have peace of mind while you’re online.

Managing your Wi-Fi has never been easier.

Setup the extender with our free EAGLE PRO AI app. And when using the extender with D-Link EAGLE PRO AI products, you can utilise the EAGLE PRO AI App’s personal AI Assistant that continuously monitors data usage and conveniently provides actionable recommendations and weekly reports.

Green technology that saves your battery life.

Target Wake Time (TWT) automatically helps reduce battery consumption for all your connected devices by devising when and how often transfers are required, TWT then automatically conserves energy and helps save battery life on your devices.
