- Optimized for full compatibility with PlayStation®4, Xbox One®, Nintendo Switch™**, PC and Mac®.
- Also compatible with Nintendo 3DS™, PlayStation®Vita, tablets and smartphones.

High-performance microphone

- Unidirectional microphone, designed to target only your voice for the most effective communication with your teammates.
- Detachable and adjustable microphone in order to adapt to every player's head size and shape.

Interchangeable faceplates

The included interchangeable faceplates allow for optimal customization of the headset

Audio performance

- True 50mm/2" analytic drivers provide crystal-clear audio without any saturation.
- Provides audio feedback designed exactly as game developers intended, thanks to the stable frequency response curve that has been optimized for gaming sessions, with perfect balance between bass, mids and treble.
- 116±3dB SPL output for elite distortion control ($\leq 1\%$) and precision.
- The best of our audio expertise, taking gaming performance to the next level.

Designed for comfort and flexibility

- Provides outstanding comfort, inspired by real life aviation headsets : 25mm/1" thick over-ear memory foam ear cushions with gel layer for utmost comfort during hours of play.
- Effective passive isolation.
- Interchangeable faceplates that allow for customization*.
- Up to 3 meters / 9ft10in of cable to adapt to any type of gaming configuration.

Sound control

- On-ear volume knob, allowing the player to adjust the audio level of the game.
- Mic volume and mute controls on in-line controller for easy access.
