Dedicated AV web-based GUI interface

Unique interface designed for the AV professional with color-coded, port-based profiles

Profiles for common audio protocols

Quickly assign profiles to ports for Dante, AES67, and AVB audio configurations. AVB Requires a separate license

Video profiles built-in

Special profiles for NVX, SVSI, Q-SYS and Dante video profiles can be easily assigned to ports as needed

Unique Automatic Configuration

Auto-trunk and auto-lag functionality automatically configures other M4250 switches for use in star topology.

Rackmount versatility

1U, 400mm deep rackmount with all power and Ethernet ports on the back

Reversed mounting possibility

Possible reversed mounting with ports in the front including recessed mounting to protect cables

Universal mounting availability

Mounting outside the rack made possible with bottom M5 and front M10 threaded holes

Adjustable fan functionality

Quiet mode with 42dB@25ºC, or fanless mode when PoE load and temperature allow

Easier configuration with new AV GUI

The AV-oriented, web-based GUI permits factory or user-specified profiles to be assigned to individual ports as needed.

Use in noise-sensitive environments

Adjustable fans can be turned off if certain conditions are met. Even the default Quiet mode is quieter than most other switches.

Get up and running fast with little engineering time required

Our NETGEAR IGMP Plus TM feature is set from the factory to ensure out-of-the-box functionality for most AV over IP installations

Multiple mounting options provide ultimate flexibility

Threaded mounting holes sized to industry standards are built into the chassis for mounting behind a display or clamped to a truss.
