Reaches further than ever before.

Wi-Fi 6 is perfect for smart homes where you need flawless connectivity on multiple devices at the same time. And Wi-Fi 6 also provides a strong network that enables the whole family to stream, game or work without worrying about buffering, dropouts or interference.

A mesh network you can rely on.

Enjoy an AI-optimised mesh network which automatically detects the optimal channels so you always experience your Internet at its best. And unique AI beamforming enhances your mesh connectivity between each node, for mesh Wi-Fi throughout your home that you can count on.

Unprecedented speeds and efficiency.

Increase your network capacity by up to 4x with MU-MIMO, OFDMA, and BSS Coloring to handle more devices on the network with incredible efficiency. Now you can connect up to 128 devices* to your smart home without worrying about your network.

Plug in for a wired Gigabit connection.

With the built-in Gigabit LAN port per node, you can use an Ethernet cable to enjoy a reliable wired connection and interference-free connectivity without dropouts.

Stay connected as you move from room to room.

Our Smart Roaming technology creates a single seamless network that ensures that your devices are automatically connected to the strongest possible signal, so you’ll always have the best connection possible as you move, without having to worry about blackspots and dropout zones.

Easy to add more coverage.

From 1-storey flats to 4-storey houses, and basements to garden decks - additional EAGLE PRO AI M15 units provide more Mesh network coverage, giving you seamless high-speed Internet coverage that will eliminate Wi-Fi dead zones in those hard-to-reach areas throughout properties of any size.

Safeguards your privacy and security for peace of mind.

Comes with the latest WPA3 wireless security that’s compliant with CNSA requirements and uses 192-bit encryption, ensuring that you and your privacy are safeguarded from unauthorised access.

Family-friendly Internet.

Create family-friendly internet by taking control of your network. Set clear online boundaries and schedules so you have less complaining and more control.
