AMD-based rack server for HPC and AI workloads

ASUS RS720A-E13-RS24G is an efficient, versatile server powered by dual AMD EPYC™ 9005-series processors, delivering exceptional performance for demanding enterprise workloads. Built on the advanced 3nm Zen5/5c architecture, these processors offer up to 192 cores, 384 threads and clock speeds of up to 5GHz, making them ideal for AI/ML processing, data analytics and virtualization. RS720A-E13-RS24G is optimized for seamless integration in modern data centers, offering high efficiency and compatibility across diverse IT environments.
