The Cisco 100G QSFP-LR4-4 transceiver module is engineered to meet the demands of modern enterprise networks, offering high-speed, reliable connectivity. With a data transfer rate of 100 Gbps, it's perfectly suited for bandwidth-intensive applications, ensuring that data flows smoothly and efficiently across the network. The module's Ethernet 100GBase-LR4 cabling type and QSFP28 form factor make it an ideal choice for organizations looking to upgrade their systems to 100 Gigabit Ethernet without significant infrastructure changes. Its wired connectivity technology ensures stable and secure connections, making it a valuable asset for businesses aiming to maintain high performance and continuous operation.
