

SYNOLOGY DP320 Backup Solution 2 Sockets AMD Ryzen Embedded R1600 8GB Memory

Model: DP320

Manufacturer: SYNOLOGY

EAN: 4711174725779

Product Code: 873511

R39,285

The Synology ActiveProtect Appliance DP320 offers security and data management solutions for businesses seeking to optimize their storage capabilities. With a total storage capacity of 16 TB and support for up to 2,500 managed servers, this appliance ensures efficient handling of critical data. The unit features two 8 TB hard drives configured in RAID 1 for data protection and availability. Designed to operate within a range of 0°C to 45°C with humidity tolerance between 8% and 80% RH, it is built to function reliably in various environments, making it suitable for demanding applications. Networking is a strong point for the DP320, equipped with multiple data link protocols, including

Gigabit Ethernet for rapid data transfer. It supports features such as scalable clustering, Single Sign-
