R211,383

The Cisco Meraki MS250-24 is a 24-port cloud-managed stackable enterprise-class access switch with four SFP+ uplinks, support for redundant power supplies for mission critical environments, and IP routing. The MS250 family includes integrated client and layer 7 application visibility, remote troubleshooting tools like live packet capture and cable test. The MS250 family is 100% cloud-managed via the intuitive, browser-based Meraki dashboard, and includes a rich, out-of-the-box feature set without additional cost and complexity.
