

Fujitsu MAS3184NC internal hard drive 18 GB 15000 RPM 8 MB 3.5" SCSI

Model: MAS3184NC

Manufacturer: FUJITSU

Product Code: 9079

R933 R1,038

MAS3184NC Fujitsu 18GB

Fujitsu's latest generation of 15K RPM Enterprise Hard Disk Drives now offers capacities of up to 73GB in a 1-inch high, 3.5-inch form factor.

The new MAS series from Fujitsu is the next generation of Hard Disk products offering low profile, high speed and high capacity to high performance enterprise computing applications.

The MAS series comes with a spindle speed of 15K RPM and in capacities of 18, 36 and 73GB. Areal density has doubled and internal drive transfer rates have been increased by 28% to 114MB/s and is equipped with an 8MB multi-segmented data buffer combined with a 32-bit wide internal data path for faster data access. Moreover, using Fujitsu's Fluid Dynamic Bearing (FDB) technology as standard across the 15K RPM series reduces acoustic output remarkably to 3.6 Bels in ready mode

The product information provided is for reference purposes only. Technical specifications, photos, descriptions and prices may change without prior notice. respectively.

The MAS series supports the Ultra 320 SCSI (320MB/s) interface which offers new performance and reliability enhancing features such as data packet protocol, quick arbitration and selection, and signal pre-compensation.

Leading edge technology enables industry leading performance specifications blended with the latest advances in interface technology, to provide a cost effective storage solution that meets the most demanding enterprise storage requirements.
