R385 R426

Seagate® Momentum® 5400 FDE.2 drives are hardware-based, full disk encryption products which offer the most advanced data protection to personal and corporate laptop users.

The Seagate® Momentum® 5400 FDE.2 hard drive is a unique solution that addresses the security needs of end-users and corporate IT managers. Personal and company data is protected from unauthorised access, whether a hard drive or system is stolen, retired or sold.

The Seagate Momentum 5400 FDE.2 hard drive is an easy value proposition for global computer manufacturers and system integrators to incorporate into higher-value solutions for their customers.

The product information provided is for reference purposes only. Technical specifications, photos, descriptions and prices may change without prior notice. The manufacturer and seller are not responsible for possible data discrepancies or typographical errors. We recommend checking the current information before purchasing.
