R1,582

Allterco Robotics Shelly LAN Switch is a compact, DIN rail mountable Fast Ethernet switch designed to expand wired networks in control cabinets and small installations. It provides five 10/100 Mbps RJ-45 ports for reliable device connectivity and an internal power supply for tidy installation.

The switch is ready to use with Plug-and-Play operation and visible link/activity and power indicators for quick status checks and basic troubleshooting. Its plastic housing and operating range from -20°C to 40°C with 30-70% humidity support stable performance in a variety of indoor environments.
