The Toughest of Its Kind

The TUF Gaming AS1000 PLUS is a portable high-performance M.2 NVMe® SSD with innovative cooling features to ensure ultrafast data transfers. It uses a USB-C® 3.2 Gen 2x2 connection to ensure compatibility with PCs, laptops, and the latest gaming consoles. It's been subjected to stringent tests to ensure your precious data is well-protected from everyday spills and knocks, and it comes bundled with NTI Backup Now EZ software for easy data backup and recovery.

Military-grade toughness

The TUF Gaming AS1000 PLUS, with its high-grade silicone rubber exterior, is subjected to a rigorous battery of durability tests, including the U.S-military-grade MIL-STD-810H drop test* and IP68 water-and-dust-resistance**. Test devices are dropped from various heights, submerged in water, and exposed to dust and dirt to ensure toughness. Rest assured that the TUF Gaming AS1000 PLUS is

more than capable of withstanding accidental bumps, knocks, spills, as well as dirt.

IP68 Resistance

Equipped with an International Protection Marking certified rating, the AS1000 PLUS is able to withstand water submersion of up to 1.5 meters for a duration of 30 minutes. This exceptional feature guarantees the security and integrity of your SSD, safeguarding it against any potential damage caused by water, debris, or dust.

810H Drop Test

The TUF Gaming AS1000 PLUS has successfully passed rigorous testing and obtained certification under the strict constraints established by the US Department of Defense. Through the MIL-STD-810H tests, this device has been subjected to an astounding 26 drops from heights exceeding 1.6 meters, guaranteeing its unmatched durability and resilience.
