Powered by AMD® A6 dual-core processing and Windows 10, the Lenovo 14w performs seamlessly, no matter the task. Supporting thousands of educational and business apps at the Microsoft Store, it also encourages greater collaboration. Through OneNote, OneDrive, and Office 365, everyone can work on the same documents at the same time, whether in the same building or across the world.

Teamwork, making the dream work

Microsoft Teams is the digital hub that brings conversations, ideas, and apps together in one place. Together with the 14w laptop, it helps your teams to achieve more by enabling them to communicate more effectively and work better together in a customized, secure online workspace.

Easy on the eyes

Behind the stamped aluminum shell cover, the 14" FHD display boasts a 6 mm narrow bezel, plus IPS and antiglare technology. The result is a larger, more vibrant screen with wide-angle viewing that's less of a strain on your eyes. There's also a touchscreen option for faster, more intuitive interaction.

Because things happen

With military-grade durability, the 14w can more than handle the bumps and knocks of everyday life. Its full-sized keyboard and mechanically anchored keys are spill resistant up to 1.39 cups / 330 ml.

Bringing everyone closer together

With two microphones, the front-facing 720p HD camera enables closer collaboration from across the room—or across the globe. Easy to use, it makes video-conferencing a breeze and more rewarding for everyone.

Leave the power cord at home

On a single charge, the 14w can run for up to 10 hours*. That should be more than enough for your daily commute, and for you to get everything done at school or work once you're there.

Windows 10 Pro in S Mode

The product information provided is for reference purposes only. Technical specifications, photos, descriptions and prices may change without prior notice. The manufacturer and seller are not responsible for possible data discrepancies or typographical errors. We recommend checking the current information before purchasing.

Built to make life easier for users and IT system administrators, Windows 10 Pro in S Mode is an enhanced security mode of Windows 10. Streamlined for security and superior performance, it enables quicker boot up times, faster app performance, and automatic cloud backups.

Mobile device management, made easy

With Microsoft Intune, managing mobile devices and deploying apps for students, teachers, or employees couldn't be easier. This cloud-based service is secure and integrates seamlessly across key applications, like Microsoft Teams and OneNote.
