Laptop gaming, further evolved

This sleek, portable 15.6" laptop pushes gaming performance to a new level. Its latest-generation specs guarantee you serious power. Thermally optimized to run cooler and quieter with a full-sized white-backlit keyboard, the Legion Y540 Laptop is primed for those who demand gaming wherever life takes them.

Trusted hardware, for legendary gaming

Legion laptops with Windows 10 Home and up to 9th Gen Intel® Core™ processors are designed to support the latest PC gaming experiences, —all with Intel's stunning media-rich graphics.* Get the winning advantage of speed, power, performance, and responsiveness. Plus, with a Legion laptop, you can game on the go with a thinner, lighter system with amazing battery life.
* PC hardware requirements may vary for games on Windows 10 Home. Games and media content sold separately.
Battery life varies significantly with device, settings and usage.

Gaming has a new look

Now is the time to embrace a machine that is worthy of you—stylish on the outside, savage on the inside. At 26 mm and 2.3 kg, the Y540 was redesigned to deliver the ideal balance between epic gaming performance and practical portability.

A new way to experience games

NVIDIA® GeForce RTX™(optional) delivers the ultimate laptop gaming experience. These sleek, powerful gaming rigs are powered by the new NVIDIA Turing™ GPU architecture and the revolutionary RTX platform. RTX graphics bring together real-time ray tracing, artificial intelligence, and programmable shading.

Designed for what's next

Anyone has the power to build a following. Now games can be shared, viewed, and played from anywhere in the world. Give friends and followers the show they deserve on a laptop with Intel’s highest-performance up to 9th Gen Intel® Core™ mobile H processors. Get the speed and flexibility to simultaneously play, record, and stream without compromise.

Even more muscle per millimeter

Expert craftsmanship extends beyond design. The Y540 represents the culmination of thousands of engineering hours to deliver a laptop that is both powerful and thin. To support up to 3200 MHz DDR4 memory, PCIe SSD storage, and more, our engineers combined their expertise in battery, I/O placement, thermals, and motherboard design to pack the best hardware into one powerful gaming laptop.

Take your games to the edge

With its thin bezels, the Y540 packs more than 2 million pixels into a near-edgeless 15" FHD display. Combined with up to 144 Hz refresh rate, 300 nits of brightness, and an IPS Antiglare screen, this laptop brings your favorite games to life, for breathtakingly immersive gameplay on the go.

Go inside the action

Dolby Atmos® pulls you into the game with powerful, moving audio that sweeps all around and above you with amazing precision and realism. A leap forward from surround sound, it gives you a competitive edge via the new Sound Radar overlay. Know where specific sounds are coming from and hear audio that heightens your sense of awareness and immerses you in a more intense gaming experience.

Time to strike

Intense firefights require the most responsive of controls, and the Y540 keyboard delivers best-in-class gaming controls to give you the edge over any opponent. Full-sized and top of the line, this keyboard delivers 100% anti-ghosting, laser-engraved WASD highlights, less than 1 ms response time, white backlighting, and more for ultimate control of your system. Further, the Y540 features Windows Precision drivers with gesture control, for effortless input whether at work or play.

The Coldfront is here

Heat—the nemesis of gaming performance—is no longer a concern, thanks to Legion Coldfront. Coldfront brings the latest features that a dual-channel thermal system can provide, including individual CPU and GPU cooling for cooler system temperatures, four thermal vents for improved airflow, dedicated heat syncs for cooler keyboard temperatures, and 70 individual fan blades per channel to reduce system noise.

Fine-tune your gaming style with Lenovo Vantage

Take your gaming to the next level with Vantage, featuring Legion Edge. Spend less time tweaking your settings and more time playing with automated performance, cooling, and power control settings. Get overclock support* for CPU and RAM, full RGB lighting controls*, real-time device performance monitoring, and more—all in one app.

*Overclocking and RGB features not available on all models.

Expand your views

You need to see more from your battle station. The Legion Triple Display Support System utilizes the HDMI 2.0, MiniDisplay, and Type-C ports, allowing the Y540 to connect up to three displays simultaneously for maximum immersion and control. Further, our rear I/O dashboard helps with cable management, keeping your battle station clean and organized for maximum focus on the game.
