KSK-5211ELU

MINI KEYBOARD

The KSK-5211ELU features a compact design and, despite its small size, all the functions of a Full-Size keyboard. The warm white backlighting is an advantage, making the keys always easy to read. The use of the X-Type membrane technology enables very silent typing. The integrated touchpad with two mouse buttons offers additional usability whenever there is no option for a mouse. And thanks to the Plug & Play function, the keyboard is quickly connected and ready for use at any time.

SOFT BACKLIGHTING

The integrated warm white backlighting of this mini keyboard makes it easier to work in poorly lit workplaces or in darkened rooms. The illumination can be switched on and off easily as needed by the push of a button on the keyboard.

SILENT TYPING

The X-Type membrane technology provides ultra-quiet typing with a responsive and comfortable writing experience. Perfect for those who like to work without distraction and do not want to disturb their colleagues.

MOUSE FUNCTIONS INCLUDED

Even without a PC mouse connected, the integrated touchpad with two mouse buttons gives you all the usual mouse functions and saves valuable space at the workplace. The touchpad is very easy to operate.
