Huion Kamvas Studio 16 graphics tablet

This is not another graphics tablet - it's a full-fledged pen computer that fits in your bag. The Huion Kamvas Studio 16 combines the functions of a laptop, a media tablet and a professional drawing display. With a 15.8-inch QHD screen, next-generation stylus and Windows 11 Pro, it's ready for everything from creative work to online meetings to relaxing with a movie. Working remotely? Studio in the open air? An office in a backpack? Have it all at your fingertips.

An image that makes a difference

The Kamvas Studio 16 screen is 15.8 inches diagonal and has a resolution of 2560 x 1440 px (QHD), which means 2.5 times more pixels than standard Full HD. The image is sharp, full of detail and simply enjoyable to look at - whether you're sketching an illustration, editing a movie or watching a

TV series. In addition, the QLED technology used provides saturated colors and deep contrasts, and 100% coverage of the Adobe RGB palette ensures that what you see is exactly what you planned. The 16.7 million (8-bit) color depth, meanwhile, ensures that tonal transitions are smooth and every detail retains its clarity.

Screen like paper

Kamvas Studio 16 uses full lamination technology and anti-reflective glass, which eliminates reflections and increases cursor precision. This gives you full control over every movement. It's the perfect environment for sketching, painting and designing with surgical precision.

Lightweight, fast and powerful

Under the hood, there's a quad-core Intel® Core™ i7-1165G7 processor backed by integrated Intel® Iris® Xe graphics, which handles photo editing, video editing and advanced graphics software. With 16GB of DDR4 RAM and a super-fast 512GB (NVMe) SSD, you can work on multiple files at once without worrying about lag. And it all runs on Windows 11 Professional, which provides a stable working environment compatible with most tools.

Precision stylus

The included PW550S is a slim 9.5mm battery-free stylus - ergonomic and as comfortable as a pencil. It supports 8192 levels of pressure, $\pm 60^\circ$ angle, and allows you to replace the tip with a felt-tip version for an even more natural drawing experience. A smaller pen tip improves visibility during detailed work, and Huion PenTech 3.0+ technology guarantees even greater sensitivity and delightful precision.

Touch support that speeds up work

The tablet supports 10-point capacitive touch that works with Windows 11 gestures - you can swipe, zoom, undo and switch applications with a flick of your finger. In addition, Huion's software allows you to assign shortcuts to gestures and quick menus, which significantly speeds up your work and access to required functions.

Practical set of ports

Kamvas Studio 16 has two full-function USB-C ports that support high-speed data transfer (USB 3.2 up to 20 Gbps), video transfer (DP 1.4) and charging at 65W. This allows you to simultaneously connect a 4K monitor, external drive or power a device - without the need for an additional docking station. Then there's the classic 3.5mm jack connector, ideal for connecting headphones or a microphone.

Mobility that doesn't limit

The built-in 58 Wh battery allows you to work for about 6 hours, and PD 65W fast charging allows you to replenish energy in 2 hours. What's more, the device supports reverse charging, which means you can charge your smartphone or other devices with it (15W). Thanks to its compact design and adjustable built-in stand, you work comfortably - in the office, at the coffee shop or even on the couch.

Ready to connect with the world

Kamvas Studio 16 has a front and rear camera (5 MP + 8 MP), two built-in speakers (2W) and a power button with fingerprint reader that can act as a quick unlock. And to top it off - Wi-Fi 6 and Bluetooth 5.0 ensure stable wireless connections to the Internet and other devices.

Included

- graphic tablet
- digital stylus
- case for the stylus
- USB-C cable
- power adapter
- folding stand
- user manual
