R54,095

The World's First and Only PANTONE Validated Digital Signage

Show off your content the way it's meant to be seen. The Pantone Validated SL6502K—the first and only digital signage of its kind—guarantees on-screen color fidelity. When paired with BenQ's Pantone Validated designer monitors, it provides an end-to-end solution that covers everything from content creation to deployment on displays.

Excellent Multi-Purpose Color Modes

PANTONE Color Mode for Perfect Colors

As the world's first Pantone Validated digital signage, the SL6502K's Pantone mode ensures 100% color fidelity and consistency.

Cinema Mode for a Movie-like Experience

Cinema mode guarantees captivating images and motion pictures that are displayed in high-contrast and vibrant color, with added depth and dimension.

Photo Mode for Vivid Images

With Photo mode, you can appreciate images from any angle. It ensures realistic, vivid colors and details without oversaturation or picture distortion.

M-Book Mode for macOS Matching

Designers no longer need to adjust or convert content. The BenQ exclusive M-Book mode replicates how videos and images are displayed on macOS devices.

Designed for Flexibility & Long-Term Use

4K UHD Clarity

An ultra-high definition 4K2K (3840 x 2160) resolution offers not only an optimal viewing experience, but also four times more information and workspace than a 1080p Full HD display.

24/7 Non-stop Operation

The SL6502K has an amazing display lifespan of 50,000 hours, which makes it far more economical than any consumer model.

Displays in Any Orientation

BenQ smart signage displays are built to be displayed in either portrait or landscape view. This flexibility offers limitless possibilities when customizing physical displays.

Slim & Lightweight

The narrow bezel and lightweight design fits any in-store environment. It makes the SL6502K ideal as a mounted or portable retail display.

Simple, Effortless Setup

Built-In Android OS

The SL6502K comes with its own Android OS, eliminating the need for an external processing device or player to access and display content.

Plug and Play

USB plug-and-play lets you access and play multimedia files directly from a USB flash drive without requiring a PC connection or complicated setups.

Quick Setup with BenQ Launcher

The BenQ Launcher running on the Android OS aggregates all device and connection settings and tools into one place for ease of use.

Wireless Presentation

The SL6502K supports InstaShare, a simple presentation and collaboration solution that allows designers to wirelessly display content.

X-Sign 2.0: Easy Content Design & Delivery

X-Sign

BenQ's X-Sign, content management software, facilitates effortless content creation, management, and delivery. Designers can either publish original material or use one of X-Sign's templates to quickly create eye-catching visuals.
