Experience immersive gaming with the MPG 341CQR QD-OLED X36. Featuring a 3440 x 1440 (UWQHD) QD-OLED panel, 360Hz refresh rate, and 0.03ms (GtG) response time, it delivers stunning clarity and speed. VESA ClearMR 18000 and DisplayHDR True Black 500 ensure vivid visuals with deep blacks and minimal motion blur. This 5th-gen Tandem QD-OLED fundamentally elevates display quality by utilizing an RGB Stripe sub-pixel layout to virtually eliminate color fringing and sharply enhance text clarity. At its core, the 5-layer Tandem OLED architecture, powered by EL Gen 3

technology, boosts light efficiency by 30%. MSI's AI Care Sensor detects user presence and activates OLED protection when idle. Paired with OLED Care 3.0, it helps prevent burn-in and extends panel life. For console users, HDMI™ 2.1 supports 4K 120Hz, VRR, and ALLM.

MSI's premium MPG series is engineered for gamers who demand strong performance and sleek design. Each product showcases cutting-edge aesthetics and vibrant colors, reflecting MPG's commitment to exceptional design. With optimized configurations, MPG creates a visually striking and powerful gaming experience that leads the trends.

Meet the 5th-Gen QD-OLED

The new 5th-generation Tandem QD-OLED panel utilizes a 5-layer Tandem OLED design powered by EL Gen 3 technology, boosting light efficiency by 30%. It features a new RGB Stripe sub-pixel layout for sharper visuals, while the DarkArmor Film delivers 40% deeper blacks and a 2.5x more scratch-resistant screen surface. Furthermore, the display reaches a peak brightness of 1300 nits and is VESA DisplayHDR True Black 500 certified, ensuring exceptional dynamic range and a truly immersive visual experience.

5-LAYER Tandem QD-OLED

5-layer tandem OLED panel and EL Gen 3 technology represents a groundbreaking display innovation, achieving lower power consumption and maintaining the peak 1300 nits of HDR performance through its 5-layer tandem structure. With EL Gen 3 technology, these advancements collectively improve light efficiency by up to 30%.

Smaller Stand, Bigger Space

The MPG 341CQR QD-OLED X36 upgrades from the previous Y-shaped stand to a sleek new flat base. This design reduces its footprint by up to 62% and allows the monitor to sit much closer to the wall, maximizing available desk space for a cleaner, more efficient setup.

TrueBright™ Certification

The TrueBright™ Certification sets a new standard for perceived display quality, measuring brightness as the eye sees it rather than raw output. Applied directly to the panel, it ensures OLED delivers superior contrast and striking visual clarity.

Super Low Motion Blur

Supports Super Low Motion Blur (SLMB) to significantly reduce ghosting and motion blur, ensuring fast-moving objects remain razor-sharp and easy to track. This technology inserts black frames between images to counteract image persistence, providing gamers with advanced motion clarity.

SLMB OFF

Motion blur visible, harder to focus on targets.

SLMB ON

Sharper motion with reduced blur — easier target tracking.

No Compromise on Privacy

All visual data is processed locally and in real time by an NPU-based chip, instantly converted into digital signals without any storage. No images are saved or transmitted, ensuring complete on-device privacy and protecting user data at all times.

KVM

Control multiple devices via one set of keyboard, mouse, and MSI gaming monitor.

MYSTIC LIGHT

Provides soft ambient lighting that easily sync with any Mystic Light-enabled gaming product.

5-Way joystick

Designed with ergonomics in mind, the 5-way Joystick Navigator is relocated to the bottom center of the back for a more comfortable user experience.

Optimized Comfort by Design

The MPG 341CQR QD-OLED X36 features a sleek, adjustable stand that lets you fine-tune height and tilt to your preference. For those seeking a clean, wall-mounted setup, the display also offers 100x100mm VESA-mount integration.

Console mode + HDMI™ 2.1

HDMI™ 2.1 provides full bandwidth up to 48Gbps, supporting VRR and ALLM for a smoother, low-latency console gaming experience at up to 120Hz. With built-in HDMI™ CEC (Consumer Electronics

Control) technology, the monitor can communicate with controllers, allowing them to wake the

monitor and adjust modes tailored to different devices.

Windows Dynamic Lighting Certification

The monitor has achieved Windows Dynamic Lighting Certification, enabling users to control and synchronize lighting effects across connected devices. Users can customize brightness, effects, and synchronization for a cohesive experience across compatible devices, ensuring seamless integration with Windows Dynamic Lighting.
