The GoFlex TV HD media player makes it easy to access, view and play your digital media files on your home entertainment system. And because it works with practically every format available, you can enjoy all your entertainment on your TV -- from Flip videos to photos to DVDs -- regardless of resolution.

- Plays your content on your TV directly from your GoFlex ultra-portable drive, or accesses your content from your digital camera, flash drive or other external drives (either Windows® or Mac®) through the additional USB port
- Hooks up to your TV in seconds via a digital HDMI® cable
- Connects to your PC or Mac computer, home network and the Internet via Ethernet or wirelessly with the optional Wi-Fi Adapter
- Lets you watch streaming media direct from the Internet, your computer and your USB devices
- Displays all the content that is included with your DVDs, including menus, commentator tracks and subtitles
- Makes navigating and accessing your digital media files easy with the included remote control and intuitive on-screen menus
- Creates exciting slideshows with your own music track for enjoying memories with friends and family
- Fits seamlessly within your entertainment centre

Flexible options for accessing your content

- Access content directly from your GoFlex or GoFlex Pro ultra-portable drive through the integrated GoFlex ultra-portable drive slot, or any USB external drive through the USB ports
- Access content from your network through a GoFlex Net media sharing device, in-home media server, or network-connected PC or Mac

Access the Internet services you use every day

Now you can enjoy some of the most popular Internet sites right on your TV, including:

- YouTube
- Paramount
- vTuner
- Mediafly
