

HATOR Icefall keyboard Gaming USB QWERTY US English Black

Model: HTK400US

Manufacturer: HATOR

EAN: 8721249196027

Product Code: 971574

R1,079

HATOR Icefall full-size membrane keyboard is an ideal choice for those who appreciate convenience and high performance. With quiet operation, a wide range of functions, a thoughtful design and rich RGB lighting, this keyboard is suitable for a variety of usage scenarios.

The membrane ensures silent operation of the buttons, which is important in many situations. The softness and quiet pressure of the keys create a comfortable environment for busy work and games.

Keycaps with a UV coating and laser engraving will provide greater resistance to erasing symbols and better protection against wear and tear due to frequent use.

The keyboard is equipped with keys for controlling multimedia. This allows you to quickly and conveniently control music playback and other functions without distracting from thy work or game.

Icefall has separate buttons for quickly switching between memory profiles. Save your settings and macros and activate them in one click, depending on the current tasks. And also use these profiles on any computer without the need to reconfigure them.

HATOR Icefall has bright RGB lighting with the ability to adjust for 8 separate zones. Eight preset lighting effects and a custom mode are available for individual customization. This allows you to create a unique atmosphere and emphasize individual style.

The keyboard has two height levels, which allows you to choose the optimal position for comfortable work and games. This feature reduces stress on your wrists and ensures long-term use without fatigue.

The software allows you to create and save macros, making it easier to create complex commands. This is especially useful for gamers and professionals who require high speed and accuracy.
