The flagship optical sensor PixArt PAW 3950 meets the demands of the most discerning gamers. With a resolution up to 30,000 DPI and acceleration up to 50G, it delivers exceptional precision and response speed, crucial for fast-paced games.

Switches with instant response, adjustable zero debounce, and a lifespan of 100 million clicks ensure precise execution of every command.

The TTC Gold dustproof encoder ensures reliable operation of the scroll wheel.

Three connection modes: 2.4GHz, Bluetooth, or wired via USB port — choose based on your current conditions and tasks.

True polling rate of up to 8000 Hz, available in both wired and wireless modes, is achieved through the use of advanced Nordic components. This ensures more detailed and precise tracking, especially during high-speed mouse movements.

The durable textured coating provides a secure grip on the mouse and resists fingerprints.

Dynamic RGB lighting effects on the back of the mouse add style to your entire setup.

600 mAh battery provides long-lasting operation even during intensive use.

Smooth and fast gliding thanks to large-area skates made from 100% PTFE for maximum maneuverability.

Easily customize the mouse settings to suit your needs with proprietary software.
