

GENESIS Xenon 220 G2 mouse Gaming Ambidextrous USB Type-A Optical 12800 DPI

Model: NMG-1572

Manufacturer: GENESIS

EAN: 5901969425437

Product Code: 972998

R865

One of the best silent mice

The Xenon 220 G2 mouse is designed for gamers who value silence. Its standout feature is its practically inaudible clicks, which make it perfect for use during night-time hours when other household members are asleep. Additionally, this mouse is characterized by a great sensor and an eye-catching design, making it one of the most intriguing offerings in the market of quiet peripherals.

Stunning design

The Xenon 220 G2 is a great choice for people who prefer accessories that not only work well, but also look visually attractive. The grooves on the sides of the mouse, along with the RGB lighting featuring a PRISMO effect, enhance the gaming experience and make the mouse visually appealing.

Advanced 12,800 DPI sensor

Demanding gamers will also be satisfied with the Xenon 220 G2. Its high-quality optical sensor boasts a maximum resolution of up to 12800 DPI and a polling rate of 1000 Hz, which allows for instant reactions during virtual games - especially during online gameplay with other equally skilled players.

Comfortable design

The Xenon 220 G2 is a mouse designed for right-handed users. Its ergonomic design allows for a natural placement of the hand and fingers, providing a comfortable grip and better gaming performance. With this design, you'll be able to maintain a comfortable position while using the mouse, allowing you to focus on your gameplay without worrying about hand strain or discomfort.

Up to 7 programmable buttons

The Xenon 220 G2 boasts 7 programmable buttons, which you can configure freely using special software to assign them specific functions or actions. This allows you to customize your mouse and tailor it to your specific needs and preferences for virtual gameplay. It's your mouse, your buttons, and your ideas on how to make the most of your accessory to enhance your virtual gaming experience.

Change DPI on the fly

You can adjust the speed of crosshair movements during gameplay or when launching a specific game with just one button press, which changes the DPI profile instantly. Additionally, you can define up to 6 personal settings in the software to switch between according to your preferences. This level of customization allows you to optimize your gaming experience and react quickly to any

changes during gameplay.

Teflon sliders

The Xenon 220 G2 is equipped with high-quality Teflon sliders to maximize the precision of the mouse. These sliders provide a smooth and predictable glide on the mouse pad, allowing for greater control over every move during gameplay. With these sliders, you'll be able to fine-tune your mouse movements to achieve the level of precision you need to succeed in your favourite games.

Advanced software

The Xenon 220 G2 comes with special software that allows you to customize the mouse to your preferences. You can choose from a variety of spectacular backlighting options and define the actions of the 7 programmable buttons to suit your needs. These settings can be saved in the built-in memory of the Xenon 220 G2, making it possible to use your customized mouse on another computer without having to reconfigure it.
