For remote employees or those running small businesses, ExpertWiFi provides stable and reliable internet connections. And with comprehensive VPN protocols, users can access their networks with site-to-site VPNs for encrypted office or home network connections, easily and securely.

ExpertWiFi provides an all-new platform for innovative business services. Brand information and advertising can be promoted via a Guest Portal, to engage with your customers in different ways.

ExpertWiFi networking products are prepared to scale to the customers' needs. The ExpertWiFi series can support up to 12 node connections, so a businesses can greatly expand the size of its network when using ExpertWiFi devices.

To make sure all data and information is secured, the ExpertWiFi series offers commercial-grade network security through a free subscription to ASUS AiProtection Pro and Safe Browsing features.

Speed up your business

A superfast business all in one access point for stable downloading and smooth video calls.

Connect your business to the max

4X greater dual-band network capacity with support for WiFi 6, which can lower latency when demand is high.

Start your business network with one device

Setting up a commercial network typically requires a significant investment in a complicated set of networking products and management fees. However, the ExpertWiFi EBR63 can empower you to easily build a cost-effective commercial network, making it an ideal choice for small businesses on a limited budget. Essential networking features are combined into one device, and we offer comprehensive software features without any subscription fees, so your business can get an edge on the competition. And as your business grows, you can easily extend your network with other ASUS ExpertWiFi products.

Stable business operation

ExpertWiFi supports virtual local area network (VLAN) management. VLAN management enables an easy, fast and flexible way to segment the network wired and wirelessly. You can dedicate an Ethernet port that provides additional security for your business.

The EBR63 provides reliable and stable internet access for business owners. With dual WAN support, you can set the USB port as a backup WAN by connecting it to your mobile phone with a hotspot. No complicated setup is needed — just plug it in and use it.

Easy settings for your business

Separate profiles and usage

A Self-Defined Network (SDN) provides up to five SSIDs to separate and prioritize devices for various business usages and network alternatives. Network segments can be made for employees, guest portals, guest networks, scheduled networks, IoT networks and VPN networks.

Scenario explorer

The scenario explorer can guide network novices through the network setup process. Just click on a scenario that suits your business the most, and it will customize your router's settings to complete the process in just a few steps.

Create your style

Guest portals can be tailored to meet your business needs, with custom portal types, branding and visual templates to fit particular business styles and to engage with customers in different ways.

Manage all devices at once

ExpertWiFi series lets business owners with multiple offices or workplaces connect all network devices under one administrator account. In addition, they can easily manage various network devices in the ASUS ExpertWiFi mobile app anywhere, anytime.

Extendable and scalable

ExpertWiFi networking products are prepared to scale to the customer's needs, whether it's a small business or a medium-sized office. With support for up to 12 node connections, companies can significantly expand their network size by adding more ExpertWiFi devices. Additionally, the EBR63 can support up to 100 active devices.

*The ASUS ExpertWiFi series is compatible with all ASUS AiMesh products, but supported features may vary based on model.

Control your business network all in one app

With the ASUS ExpertWiFi app, you can set up and manage your business network easily and conveniently.

Commercial-grade network security

Site-to-site VPN

Site-to-site VPNs are useful for companies that prioritize private, protected traffic. They are particularly helpful for organizations that have multiple locations spread out over great distances, such as chain stores and overseas branch offices. Using a site-to-site VPN can quickly help you build up your private network to connect all these places and to share information or resources between intranets from different locations.

Protect your businesses

ASUS AiProtection Pro leverages powerful cybersecurity solutions and cloud data centers from Trend Micro™ to shield your business and all connected devices from cyber threats — with no subscription fee!

One-tap security scan

Check your security level with one tap, instead of fiddling with complicated settings.

Multi-functional hardware

Adaptable to any space

The ExpertWiFi EBR63 comes with a built-in bracket and wall mount holes that can be adjusted to fit into almost any location for space-saving and more flexibility. The bracket also doubles as a cable organizer, making it easy to keep your workspace clean and organized.

Versatile connectivity

ASUS ExpertWiFi EBR63 features two USB ports, enabling easy connection of business devices like printers and POS machines for seamless resource sharing. Additionally, the USB ports can serve as a backup internet provider with your mobile hotspot, by just plugging it into your smartphone, ensuring an always-on business network.

Sustaining an Incredible Future

Environmental Certification*

ASUS ExpertWiFi is stringently tested to meet the requirements of world-leading sustainability certifications. These tests include a comprehensive database of up-to date criteria, independent verification and a structured system for continuous improvement.

Eco-friendly Packaging

All ExpertWiFi products come with environmentally friendly packaging sourced from FSC-certified responsible forestry, and they benefit from more active management of the use of chemicals in the production process, to improve the recycling of packaging and substances, and to reduce environmental impact.
