Easily handle dozens of devices streaming and gaming at the same time with WiFi 6 OFDMA technology, enabling your Wi-Fi to connect more devices compared to Wi-Fi 5 router. Future-proofs your home or office networks by providing greater capacity to connect more devices, add more Wi-Fi devices will no longer means dragging down performance.

75% Lower Latency

Deliver powerful, continuous Wi-Fi signal, achieving 1.5X larger capacity than standard AC Wi-Fi. OFDMA technology reduces lag by up to 75%, ensures ultra-responsive real-time gaming and smoother experience.

Boost Coverage

What troubles you most when using a WiFi network? Limited coverage, unstable signals, and long-term buffering are the answers for most people. Equipped with independent Front-End Module and four high-gain antennas, the Cudy AX1800 WiFi6 router effectively enhances the strength of the WiFi signal and greatly improves the WiFi coverage. At the same time, the beamforming technology makes WiFi no longer a headless fly, but can be accurately positioned the direction of the WiFi device and transmits signals accurately and efficiently.

Minimize Interference

Interference from your neighbors' wireless networks can cause issues with your wireless signal. Cudy BSS Color technology solves this problem very well. It marks frames from neighboring networks so that your router can recognize and ignore them. If you have ever lived in an apartment or close to your neighbors, this means that your router just became that much more efficient – no extra configuration required.

Backwards Compatible

Fully unlock the potential of your Wi-Fi 6 devices and backward compatible with existing 802.11 ac/a/b/g/n devices. If you already have an iPhone 12, 11 or SE, Samsung Galaxy S10 or Note 10, OnePlus 8, Asus Chromebook Flip c436, Dell XPS 13 (2020), HP Spectre x360, Lenovo Yoga c940 or LG Gram 1, then cudy WiFi 6 router is your best option, while if you don't have an WiFi 6 device for now, Cudy
