Keep buffering at bay with Wi-Fi 6 standards. The advanced 1024-QAM modulation and a higher symbol rate boost the 5 GHz speed by 38%, offering super-fast download rivalling a Gigabit Ethernet wired network.

Boosted Coverage, Lower Latency

Beamforming detects the direction of connected devices and forms a focused signal towards them to improve coverage.

Versatile Functionalities

VPN Client

Enables work from home and secure remote access with the support of popular VPN protocols.

Parent Control

Set Wi-Fi time schedules and block inappropriate websites to protect your loved ones.

Cudy Mesh

Supports Cudy Mesh to enable seamless roaming for the whole home with other Cudy Mesh devices.

IPTV

Configure a specific network port for IPTV transmission to deliver television services from the network operator to your TV.

Encrypt Your Wi-Fi to the Highest Level

The legacy WPA and WPA2 are weak under the risk of brute-force attacks. WPA3, as the latest encryption protocol, encrypts your wireless communication to the best level, protecting your data from leaking.
