

Intellinet 5-Port Gigabit Ethernet PoE+ Switch with SFP Port, Four PSE PoE Ports, IEEE 802.3at/af (PoE+/PoE) Compliant, PoE Power Budget of 91 W, Desktop Format, Wall- mount Option

Model: 561822

Manufacturer: INTELLINET

EAN: 766623561822

Product Code: 973580

R2,654

Desktop 5-Port PoE Switch with Gigabit Uplinks - Supports 10/100/1000 Mbps, Power over Ethernet 802.3at

The 5-Port Gigabit Ethernet PoE+ Switch with SFP Port from Intellinet Network Solutions passes both data and electrical power to a number of PoE-compatible devices via standard Cat5e or Cat6 network cables. Equipped with five Gigabit Ethernet ports - four of which are high-power PoE+ PSE ports - this switch can power wireless LAN access points and bridges, VoIP phones, IP video cameras and more while delivering network speeds of up to 1000 Mbps.

High-power PoE+ with output up to 30 watts

This switch supports the IEEE 802.3at protocol and can inject up to 30 watts of power per port. IEEE802.3af- or IEEE802.3at-compliant devices attached to the switch require no additional power, which eliminates the time and expense of electrical rewiring and minimizes the unsightly clutter caused by power supplies and adapters in awkward places such as ceilings and walls. Any mix of PoE and non-PoE devices is supported, and thanks to its short circuit, overload and high-voltage protection function, your equipment is well-protected.

Gigabit Uplinks

The switch is equipped with one Gigabit RJ45 and one SFP transceiver module slot. These Gigabit uplink ports are ideal for connecting the switch to the network's backbone, a server or, perhaps, your video recording solution (NVR).

Wall-mount option

For full installation flexibility, you can mount the switch on the wall through its four built-in holes or use the included non-slip rubber feet to place it on a desktop.
