Intellinet 5-Port 2.5G Ethernet PoE+ Switch Four PSE PoE+ Ports, 10/100/1000/2500 Mbps on all Ports, 55 W PoE Power Budget, Unmanaged, Desktop Format, Wall-mount Option

Model: 561921

Manufacturer: INTELLINET

EAN: 766623561921

Product Code: 973582

R5,685

Next-gen 2.5 Gbps Desktop 5-Port PoE Switch - Supports 10/100/1000/2500 Mbps, Power over Ethernet 802.3at

The 5-Port 2.5G Ethernet Unmanaged PoE+ Switch from Intellinet Network Solutions passes both data and electrical power to a number of PoE-compatible devices via standard Cat5e or Cat6 network cables. Equipped with five multi-gigabit Ethernet PoE+ copper ports, this Switch can power wireless LAN bridges, VoIP phones and more while delivering network speeds up to 2500 Mbps.

Eliminate bottlenecks with 2.5G capability - great for high-bandwidth Wi-Fi 6 IEEE 802.11ax Access Points and more

Since at least the arrival of Wi-Fi 6 (but even with legacy Wi-Fi 5 [802.11ac]), "regular" Gigabit Ethernet ports have been at their bandwidth limits when connecting to wireless networks. This Switch's ability to support 2.5GBASE-T means it can deliver data to wireless APs faster and better accommodate other higher-bandwidth devices in your enterprise network.

High-power PoE+ with output up to 30 watts

This switch supports the IEEE 802.3at protocol and can inject up to 30 watts of power per port. IEEE802.3af- or IEEE802.3at-compliant devices attached to the switch require no additional power, which eliminates the time and expense of electrical rewiring and minimizes the unsightly clutter caused by power supplies and adapters in awkward places such as ceilings and walls. Any mix of PoE and non-PoE devices is supported, and thanks to its short circuit, overload and high-voltage protection function, your equipment is well-protected.
