The GS1920v2 series introduces Zyxel NebulaFlex™, which allows you to easily switch between standalone mode and our license-free Nebula cloud management platform anytime with just a few simple clicks.

Maximum flexibility for your Gig

The GS1920v2 series is ideal for SMB deployment in multiple scenarios, with its unique port combinations futureproofing your network to ensure easy growth down the road.

Whisper-quiet operation

Smart fan and fanless designs for silent operation in your workplace.

User-friendly LED indicators

View real-time status instantly with cloud and PoE power-usage LED indicators.

Power more devices more easily

Provides 30W per port and a wide range of power budget options from 130W to 375W—ideal for denser PoE deployments.

Default consumption mode boosts efficiency by delivering the actual power required.

Zyxel ONE Network

Use the complimentary ZON Utility to configure and discover switches, WLANs, and gateways in your network with one click.

Designed for the long haul

A web smart managed switch with an enterprise-grade hardware design. Built-in state-of-the-art hardware technology brings high quality and robustness to SMB networks.
