

XPG LANCER RGB memory module 32 GB 2 x 16 GB DDR5 288-pin DIMM ECC

Model: AX5U6000C3016G-DCLANRSG

Manufacturer: ADATA

EAN: 4711085948977

Product Code: 974098

R8,595

World's 1st Eco-Friendly RGB DDR5 Memory Module

LANCER NEON RGB is the world's first environmentally friendly RGB DDR5 gaming memory module with a heatsink made from 50% PCR plastic materials and FSC certified packaging, lowering carbon emissions by 72.5%. Add a shining gamer's style to your PC while doing your part for the environment.

Eco-Friendly IMR Creates Green Gaming Aesthetics

LANCER NEON RGB adopts an environmentally friendly IMR (in-mold roller) process combined with LANCER's unique design language to create a singular and sensational heatsink pattern.

Lightning Fast, Stable, & High Quality

Carefully selected high-quality memory chips and 10-layer circuit boards deliver fast and stable clocks and transmission speeds of up to 8,000MT/s, making this module perfect for gamers and overclockers pursuing pure speed.

Exclusive Coating for Worry-Free Overclocking

LANCER NEON RGB utilizes an exclusive heat dissipating coating on its PCB that effectively reduces temperatures by 10%, ensuring the memory module maintains performance even at high speeds while increasing product stability and durability.

Immersive 60% RGB Surface Illumination

Set the RGB lighting the way you want it. Choose from different effects (static, breathing, and comet) or sync the lights with your favorite jams via Music Mode. All this can be done through RGB control software from all the major motherboard brands.

Create Personalized Lightshow with XPG Prime

XPG Prime lighting control software not only allows you to set unique DRAM lighting effects, you can also sync all Prime supported XPG RGB products to create imaginative light shows and shape your own Prime ecosystem.

Enhanced Power Management

The XPG LANCER NEON RGB DDR5 features a built-in Power Management IC (PMIC) that enhance power supply stability. Its lower operating voltage also makes LANCER more power-efficient than DDR4.

Stability and Reliability

The product information provided is for reference purposes only. Technical specifications, photos, descriptions and prices may change without prior notice. The manufacturer and seller are not responsible for possible data discrepancies or typographical errors. We recommend checking the current information before purchasing.

With On-die error correcting code (ECC), this DDR5 memory module can correct errors in real-time to provide increased stability and reliability.

Overclocking Made Easy

With support for Intel XMP 3.0, get overclocking easily without the need to hassle with BIOS settings. There is no need to repeatedly adjust and fine-tune overclocking parameters.

AMD EXPO

Support for AMD EXPO (EXtended Profiles for Overclocking) and compatibility with the latest platforms for reliability and stability.
