R751

USB ODA Flash drive allows you to use one USB drive with various desktop and mobile devices. With both USB 3.2 type A and USB type-C™ connectors, USB ODA can help you to move data between desktop computers and newest mobile phones and tablets.

Ready to work

Type-C™ is becoming the most popular USB type used to transfer data between all electronic devices. The growing popularity of this solution is supported by the fact that manufacturers of next gen laptops, smartphones, PCs and other devices are increasingly equipping their products with an additional "C" next to the standard type A connector or choose only Type-C™. Goodram OTG ODA
