TORON 301

GAMING HEADPHONES

Here is the GENESIS Toron 301 - an economical headset for those who want a taste of real gaming. Noteworthy are their light weight and 53-millimeter drivers - which will make virtual play more enjoyable, even during longer games. Comfort of use comes from a number of solutions inspired by their older sibling, the GENESIS Toron 531 headphones.

THIS SOUND MAY SURPRISE YOU

GENESIS Toron 301 is a good choice for both gamers looking for fun in singleplayer titles and lovers of esports competition. You'll be able to change the volume of the sound you're listening to on the panel on the shell, and thanks to the 53-millimeter drivers, you'll be able to easily interpret the individual instruments that contribute to your favorite soundtracks. However, it will be just as easy to track down your opponents during digital skirmishes - you can easily locate sounds that betray your enemies' locations, allowing you to reach for victory.

LONG, COMFORTABLE GAMING? IT IS POSSIBLE!

A durable headband, padded on the inside with a pleasant-to-touch material, as well as comfortable earcups, contribute to the comfort of play. You can replace the standard pads of the GENESIS Toron 301 headphones with hybrid pads (EP01) and fabric pads (EP02), available for purchase separately.

FREEDOM OF COMMUNICATION

The frequency response range of the included dynamic microphone is 100 to 10,000 Hz - and you can adjust its position to your preference thanks to its flexible design. However, if you use an external microphone on a daily basis, there's nothing stopping you from detaching the microphone from the headset completely, further reducing the overall weight of the GENESIS Toron 301.

SET THE RULES

It's up to you to decide how to use the GENESIS Toron 301 headphones - connect them to your phone, console or any other device. The condition is that your equipment has a 3.5 mm connector, so you can plug in the headphones.

KEEP YOUR STYLE

GENESIS Toron 301 are designed in two color options. Do you prefer black accessories on your desk? Or do you prefer the white of the individual design elements of your work or rest area? Now you can choose the color of your new headset - maintaining your individual style and matching your new headphones with your other accessories.

YOU WILL FORGET THAT YOU HAVE THEM ON YOUR HEAD

Uncomfortable and heavy headphones are the bane of gamers who devote many hours each day to their hobby. The lightweight design of the GENESIS Toron 301 headphones is the answer to everyday ear and headaches - they weigh just 230 grams, which puts them at the forefront of lightweight headphones among competing equipment at a similar price.
