OneOdio OpenRock S2 Wireless Headphones (black)

OpenRock S2 are wireless headphones that let you enjoy your favorite tunes without cutting you off from the world around you. Thanks to the special open-ear design, you can listen to music while running, biking or hiking in the mountains and at the same time stay safe - still hear traffic or other people's voices. This is the perfect choice for active users! The headphones boast great sound quality, long runtime (up to 8 hours) and Bluetooth 6.0 connectivity, plus they are compatible with the OpenRock app, which allows you to conveniently manage their operation.

Powerful sound, natural sound

The OpenRock S2 are certified for Hi-Res Audio Wireless (High Resolution Audio Wireless) and support LDAC (Low Latency Audio Codec, an audio codec), which means they transmit high-resolution music in full detail. BassDirect™ technology further enhances low frequencies, offering deep and dynamic sound. This combination makes every song sound exceptionally natural and spacious.

Crystal clear conversations with noise cancellation

The headphones feature four microphones and AI Noise Cancellation (Artificial Intelligence Noise Cancellation). This technology effectively filters out noise and wind noise during conversations, so your voice remains clear and crisp even in demanding conditions. Whether you're talking during a workout or on a crowded street, you can always count on excellent call quality.

Long runtime and fast charging

OpenRock S2 allow you to enjoy music for up to 8 hours non-stop, and the charging case extends this time to about 32 hours. In addition, thanks to the fast charging function, it only takes 5 minutes to get energy for another hour of playback.

Stable fit and comfort

With an ergonomic shape and a special headband worn over the ear, the OpenRock S2s hold steady even during intense running or cycling. What's more, each earphone weighs just 7g - you won't even feel you're wearing them. Then there's the skin-friendly silicone and the IPX5 (Ingress Protection X5, sweat and splash resistance) rating, which ensures resistance to sweat and splashes. As a result, the S2 model will perform well even during extremely intense workouts!

OpenRock app - full personalization

Thanks to the dedicated app, you gain full control over the headphones. Using it, you can, for example, choose from the available modes (Rock, Relax or Boom), matching the sound to your favorite music, or use the Spatial Sound function, which gives the impression of surround sound. The app also offers a volume limiter, wear time reminders and customizable buttons. In addition, the Find My Buds option will help you quickly find your headphones if you lose them.

Stable connection to multiple devices

OpenRock S2 use Bluetooth 6.0 technology, guaranteeing a stable and fast connection. What's more, you can connect the headphones to, for example, a smartphone and a laptop at the same time, and then switch seamlessly between the two - without having to pair again.

Remote control of the camera

OpenRock S2 is not just about music and calls. With the practical remote camera control feature, you can take photos and record videos with your smartphone with a single button on the handset. This is great for travelers and content creators who want to capture their adventures in a simple and convenient way.
