

D-Link 8-Port 2.5G Multi- Gigabit PoE++ Unmanaged Switch

Model: DMS-108P/E

Manufacturer: D-LINK

EAN: 790069476839

Product Code: 975635

R4,677

Plug & Play

No complex configurations required for fast and easy network connectivity

Multi-Gigabit

Multi-Gigabit ports for high data rate transmission

High Power Budget

230W PoE total budget to power more devices

IEEE802.3bt

Up to 90W per port enables high-power devices (PD)

The product information provided is for reference purposes only. Technical specifications, photos, descriptions and prices may change without prior notice. The manufacturer and seller are not responsible for possible data discrepancies or typographical errors. We recommend checking the current information before purchasing.

Multicast Optimization

IGMP snooping feature prevents network flooding

Silent Operation

Fanless design for a noise-free working environment

Unleash Wi-Fi 6 via 2.5G Ports

As Wi-Fi 6 (802.11ax) delivers ultra-fast speeds and low latency, standard Gigabit Ethernet can become a bottleneck. 2.5G Ethernet offers 2.5x the bandwidth without new cabling, unlocking the full potential of Wi-Fi 6 for smoother 4K/8K streaming, HD surveillance, AR/VR gaming, data transfer, and data-intensive environments. Future-proof your network and experience Wi-Fi 6 at its best—fast, reliable, and unrestricted.

Small Size, Big Power

The DMS-108P with IEEE 802.3bt (PoE++) delivers up to 90W per port with a 230W total power budget, enabling high-performance devices without additional power supplies. Ideal for Wi-Fi 6 access points, PTZ cameras, kiosks, smart LED lighting systems, and much more. PoE++ simplifies installation, reduces cabling costs, and enhances energy efficiency.

Smarter Multicast, Smoother Performance

The DMS-108P enables IGMP Snooping to enhance network efficiency by intelligently managing multicast traffic, ensuring data reaches only the devices that need it. This reduces bandwidth congestion, improves video streaming and VoIP performance, and optimizes IPTV, surveillance, and enterprise networks.

Prioritize Traffic for Optimized Performance

With the DMS-108P, you can effortlessly manage your network traffic with the 802.1p Quality of Service (QoS) feature. The switch automatically organizes and prioritizes time-sensitive and critical data for efficient delivery, enabling buffer-free video streaming as well as jitter-free video and voice calls.
