R108,313

The HP ZBook 8 G1as Mobile Workstation combines performance and versatility, designed for professionals who require reliable hardware to tackle demanding tasks. Featuring a 14-inch anti-glare IPS display and powered by the AMD Ryzen AI 9 HX PRO processor with a maximum turbo speed of 5.1 GHz, this workstation is built to handle complex applications with ease. The integrated AMD Radeon 890M graphics processor ensures smooth visuals, making it suitable for graphic design and data analysis work. With 24 MB of L3 cache and quick access NVM Express SSD storage, efficiency and speed are prioritized.

Security and connectivity are integral to the design of this mobile workstation. The HP Tamper Lock sensor enhances the device's security, while various ports including USB 3.2 Gen 1 and USB-C with Power Delivery offer seamless connectivity for peripherals. The dual-array digital microphones and
