

SHELLY LAN Switch DIN Rail Ethernet Expansion Network Switch

Model: FG3800235266830

Manufacturer: SHELLY

EAN: 3800235266830

Product Code: 982724

R1,582

Allterco Robotics Shelly LAN Switch is a compact, DIN rail mountable Fast Ethernet switch designed to expand wired networks in control cabinets and small installations. It provides five 10/100 Mbps RJ-45 ports for reliable device connectivity and an internal power supply for tidy installation.

The switch is ready to use with Plug-and-Play operation and visible link/activity and power indicators for quick status checks and basic troubleshooting. Its plastic housing and operating range from -20°C to 40°C with 30%–70% humidity support stable performance in a variety of indoor environments.

The product information provided is for reference purposes only. Technical specifications, photos, descriptions and prices may change without prior notice. The manufacturer and seller are not responsible for possible data discrepancies or typographical errors. We recommend checking the current information before purchasing.
